Solutions

SAP Business One
CompuTec ProcessForce

Supporting rapid expansion, compliance and traceability with SAP® Business One and ProcessForce

With the need to support BRC requirements alongside more and more regulations that are being put into place, we could see that the solution would handle all of that really well.

Before: Challenges and Opportunities

- Previous system could not cope with this level of rapid expansion
- The business looked for a system with capabilities to support food industry requirements
- Enabling room for further growth

Why SAP, ProcessForce and the partner

- ProcessForce is fully integrated with SAP Business One
- ProcessForce can cope with UK BRC registrations and batch traceability requirements

After: Value-Driven Results

- More transaction than in the previous system that we had for 8 years
- SAP Business One and ProcessForce allowed company to grow 50% annually
- Stable system without any performance problems
- Fully linked processing from sales order to manufacturing order and delivery

“We have no intention of staying where we are and can see that SAP Business One together with ProcessForce will help us to expand even further.” – Mike Alexander, Financial Controller at Evolution Foods
