

Fobos Invest Sp. z o.o.

Industry: Co-packing, Co-Manufacturing

"Before implementing SAP Business One we were using a number of IT systems for production reporting for recording warehouse movements and for accounting. Our goal was to introduce one cohesive system that would cover and connect most of the processes in the organization."

Paulina Brzezicka, Director of Business Development, Fobos Invest

Fobos Invest works with global household names from the food industry for which it breaks down large shipments into smaller units and repackages them. The company's factory is integrated with the production planning and logistics systems of its customers. Currently the business exports to most European Union countries as well as to the countries of North and South America, Australia, Japan and South Korea.

Key benefits of implementing SAP Business One and CompuTec solutions:

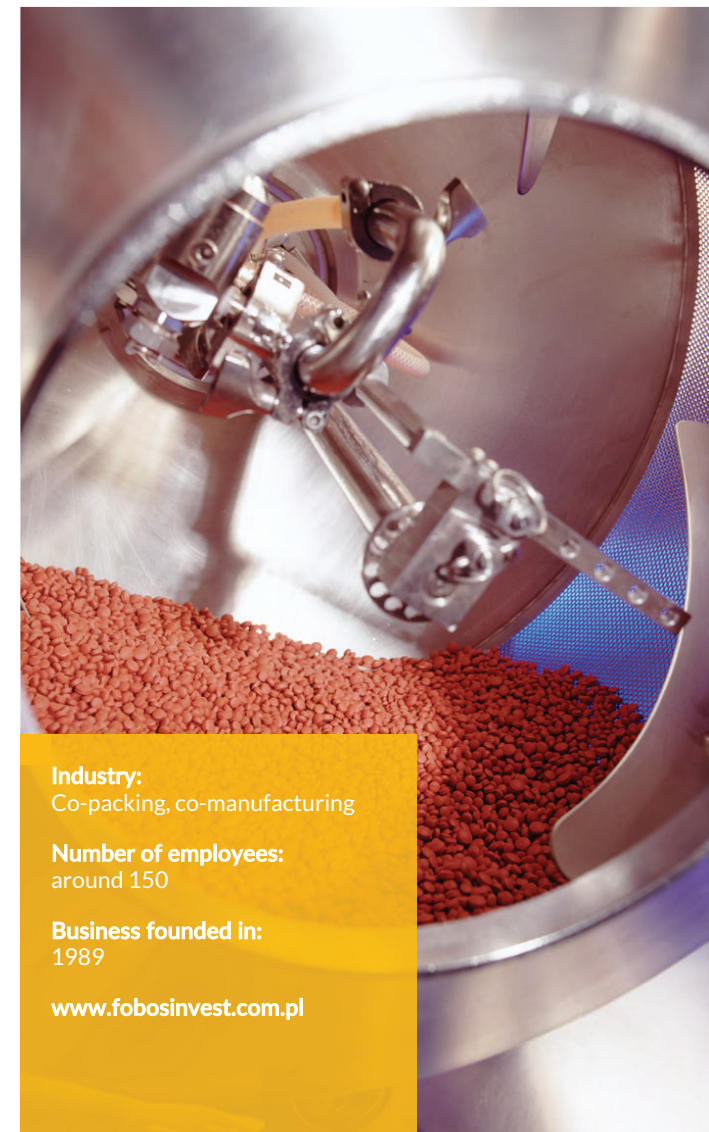

- data from most processes collected into a single repository, which allows for better and more effective management of individual departments as well as fast and efficient interdepartmental communication
- reports generated automatically with report generation time reduced by 80%
- real time data analysis offering the business the ability to make decisions quickly and the flexibility to easily introduce changes
- streamlining of business processes, elimination of superfluous activities and reduction of time spent on task execution

Principal functional requirements:

- integration with customers' SAP solutions including for the purposes of MRP
- production scheduling via Gantt chart
- integration of SAP Business One with the warehouse (CompuTec WMS)
- automated printing of logistics labels and goods receipt /delivery documents
- functional extension modules (PDC/WMS)

report generation time
reduced by 80%

Industry:
Co-packing, co-manufacturing

Number of employees:
around 150

Business founded in:
1989
