

IKANO

Industry

Ikano Industry Sp. z o.o.

Industry: Mattress production

"We use a number of internally-developed, bespoke applications that support various aspects of our business. We needed a system that would be open to co-existing with those programs. SAP Business One turned out to be just what we were looking for."

Maciej Galinski, Software Development Manager, Ikano Industry

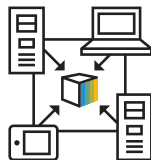

Ikano Industry deals with the production of mattresses for IKEA in Poland, Germany, France and in Asia. They manufacture more than 200 different types of mattresses: starting from the production of polyurethane foam, cutting patterns, sewing covers and finally delivering the final goods to IKEA's network of stores. Ikano Industry is the only factory in Europe with chemical recycling facilities for flexible polyurethane foam. The resulting raw material is reused during the production process.

Key Benefits of implementing SAP Business One:

- data reporting
- data security, particularly concerning financial data in the finance and accounting module

Principal functional Requirements:

- integration with the existing systems in place
- potential for customization
- speed and efficiency

Industry:
Mattress production

Number of employees:
around 1000

Business founded in:
1992
