

Copal Sp. z o.o.

Industry: Aluminum products and aluminum alloys

"Thanks to SAP Business One, we've got a centralized database which lets us better track sales, purchasing and production documents. SAP Business One has given us a solid IT foundation for obtaining and maintaining ISO 9001: 2015 and ISO 14001: 2015 compliance."

Przemysław Janczewski, IT Manager, Copal

Polish company, Copal, specializes in the processing of aluminum, the production of aluminum systems for building balconies and terraces and the sale of facade panels. They supply, amongst others, the largest property development enterprises in the country. Copal's mission is to continue their expansion and maintain their strong position as a supplier of innovative and ecological solutions for the construction industry on the domestic and European market.

Key benefits of implementing SAP Business One and CompuTec ProcessForce:

- production planning with accountability for time and materials
- a central information repository from which accounting, customs and tax regulations can be supported
- reduction in paperwork
- continuous updates - new solutions as well as formal and legal requirements
- greater control over the tasks allocated to specific departments and employees

Principal functional requirements:

- faster reporting and instant availability of statistics about various areas of activity
- a simpler and faster way to protect and potentially recover data
- production reporting based on time and attendance
- monitoring the demand for raw materials
