#CompuTec

Cloud powered by **SAP** Business One based on ⬛ Microsoft Azure

What is CompuTec Cloud?

CompuTec Cloud is a multi-tenant cloud hosting platform specifically catering to businesses using SAP Business One on its own or together with the CompuTec Solution Suite, including CompuTec AppEngine plugins.

✓ SAP Business One and the CompuTec Solution Suite tailored to your needs in the Cloud

✓ Complete data privacy from fellow cloud users

✓ World-class IT and security infrastructure without the formidable investment

✓ Pooled cloud resources mean lower costs

✓ CompuTec experts manage and maintain the servers so you don't have to

Microsoft Azure Data Centers

With CompuTec Cloud your data will be hosted by Microsoft Azure's global network of more than 200 state-of-the-art data centers.

- Unparalleled physical and digital security
- Equipped with highly sophisticated hardware
- Built to withstand natural and manmade disasters

CompuTec Expertise

With CompuTec Cloud you'll be in the safe hands of CompuTec's team of Cloud ERP experts. We've been working with SAP Business One since its infancy and are one of the most awarded SAP Business One partners in our region. With multiple successful CompuTec Cloud implementations now under our belt, as well as awards from our Cloud partner, Ingram Micro, and SAP, we have added an exciting new dimension to our expertise.

85% of Fortune 500 companies have already chosen Microsoft Azure

CompuTec Cloud guarantees 99.5% availability

No functional limitations

CompuTec Cloud gives you the flexibility to tailor SAP Business One and CompuTec solutions to your own unique requirements. You can add as many validations, automations, blockades, custom reports, custom layouts and, of course, CompuTec AppEngine plugins as you like. The end result is the ERP solution that your business needs – available, flexible, secure and running like a well-oiled machine.

Security

Microsoft invests billions of dollars every year to secure its data centers, meaning they offer levels of data security unachievable by most private data centers.

Scalability

Is your server capacity struggling to keep up with your business's growth? CompuTec Cloud is easily scalable. Need more server space? You can have it, immediately, without investing in more hardware.

Mobility

Say goodbye to your employees being tied to the office and the lag that comes with working remotely from even the most advanced on-premise setups. With CompuTec Cloud your employees can access their work environment via the fastest, geographically closest servers around the clock no matter where they are working from. You can expect improved collaboration, productivity and employee satisfaction too.

Technology

CompuTec Cloud and Microsoft Azure Data Centers give small and medium-sized enterprises access to the kind of technology and hardware that is normally only within the financial reach of large corporations. Cloud technology levels the playing field for SMEs competing against market leaders.

Cost efficiency

Cut down on up-front investments in:

- Software licenses
- IT infrastructure and hardware
- Personnel to manage and maintain the system
- Specialists to take care of upgrades and data security

CompuTec Cloud
your way

SaaS
(Software as a Service)

The all-inclusive, hassle-free approach to cloud ERP. Software, data hosting, cloud-based IT infrastructure, software updates, backups and data security are included in your subscription. You'll be billed periodically per user and we'll take care of the rest.

PaaS
(Platform as a Service)

Like SaaS but software licenses are purchased separately. If you've already purchased software licenses, then the PaaS model could be the right fit for you. There's no need to pay for licenses all over again and you can still enjoy all the benefits of CompuTec Cloud. Other services like data hosting, cloud-based IT infrastructure, software updates, backups and data security are all covered by your subscription.

IaaS
(Infrastructure as a Service)

You buy cloud resources e.g. servers, networks, virtual machines, etc. from CompuTec and access those through an internet connection but the licenses and software, including administration and upgrades, are entirely your own or you can contract us to do it for you. This is a great option for those who require a high degree of freedom and independence or already have an in-house team of experts to run the system.

CompuTec Cloud Pioneers

POLCOM GROUP

Industry:	Premium modular building construction
No. of Users:	200+
Customers:	Residential property developers, household name hotel groups such as Hilton, Marriot, Intercontinental and more.
